100% sustainable stationery solution

## ABOUT US

**GreenQurve** is a pioneering manufacturer of sustainable stationery products, dedicated to transforming the way businesses approach office supplies.

Originally **established in 1989** as Fortune Enterprises, we launched the GreenQurve initiative to focus on B2B bulk orders, specializing in sustainable stationery. Through innovative processes, we transform agro waste materials like sugarcane waste (bagasse), wheat straw (parali), and rice straw into high-quality, eco-friendly products.

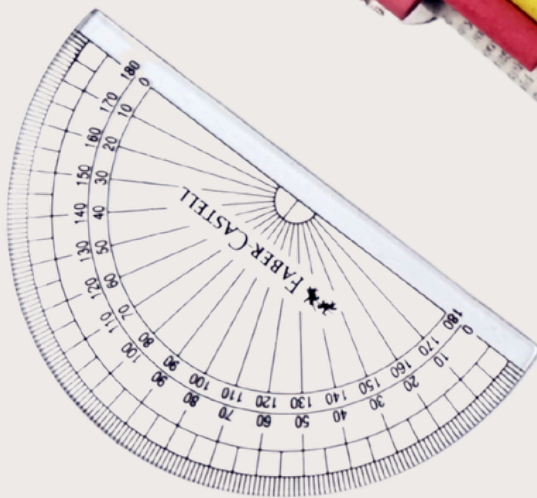

## OUR STORY

**As eco-enthusiasts,** we were troubled by the environmental impact of traditional stationery manufacturing.

We saw mountains of waste and a dependence on unsustainable materials, and it ignited a fire within us to create change.

**In 2016,** we took a bold step forward by launching the **GreenQurve initiative** with a vision to transform agro waste into beautiful, functional stationery. Our mission became twofold: to reduce waste and to inspire others to embrace sustainable practices and join our cause for a greener future.

## OUR PHILOSOPHY

Write Sustainable 

Each word you write is a step toward a greener tomorrow.
